

HARBOURISP

One of your neighbours just had NBN Satellite Broadband installed - You can too!

We support broadband for all Australians no matter where you live.

What is the NBN Satellite Service? People in homes, small businesses and indigenous communities in some of the most remote areas of Australia are among the first users of the new broadband satellite service provided over the NBN. NBN Co's Satellite Service is now available to eligible individuals and small businesses on the mainland and across Tasmania through Harbour ISP, with the priority being given to those who currently have no alternate access to broadband services.

Am I eligible for a Subsidised NBN Service? You may be eligible if you are unable to access a metro comparable broadband service, have not previously received a subsidised satellite broadband installation, or your existing satellite broadband service has been installed for more than 3 years. Call us for help on determining your eligibility.

- ✓ Free Installation #
- ✓ Speeds up to 6/1mbps
- ✓ Hardware cost fully subsidised #
